

ComputerVision HW3 Report

Domenic Mancuso

October 2025

In this project I was able to follow the instructions provided in the pdf to make a SIFT model that matches keypoints using BFMatcher. The model does not outperform the professor's but it has accurate matches.

Figure 1: Matched keypoints

```
Total matches: 101  
Good matches: 27  
Bad matches: 74  
Accuracy: 26.73%
```

Figure 2: Results
